

## IMPACT CASE STUDY

**Eco Arbor Designs** creates sustainable decking systems that blend modern design with a deep commitment to environmental responsibility.

Through their nonprofit partner, **Save Our Shores**, they help protect coastlines, remove ocean plastics, and educate future environmental leaders.

By partnering with PIE, Eco Arbor turned their everyday business expenses into recurring donations—reducing costs while funding marine conservation with every transaction.

**\$500**  
on their 2024 donation  
to Save Our Shores

Together, PIE and Eco Arbor audited expenses and uncovered savings that aligned with their mission. PIE identified high processing fees, guided a seamless switch to a purpose-driven payment provider, and helped launch their **“Payments with Purpose”** message to spotlight impact.

The result: improved vendor terms, better cash flow, and a smooth transition with zero disruption. And in 2024, Eco Arbor’s PIE partnership generated a \$500 donation for Save Our Shores, directly supporting cleaner oceans and stronger coastal communities.

*“Working with Purpose In Expenses (PIE) has been an outstanding experience. Their team combines professionalism and mission-driven focus in a way that’s rare. PIE’s systems are smart, their support is proactive, and their impact is tangible. I highly recommend them to any organization looking to align finances with purpose.”*
